## **DETAILED ACTION**

### ***Double Patenting***

Claims 1, 9 and 11 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 3 and 5 of U.S. Patent No. 6,677,243. Although the conflicting claims are not identical, they are not patentably distinct from each other because all aspects of pending claim 1 are fully encompassed by claims 1, 3 and 5 of 6,677,243.

The claims of 6,677,243 do not recite limitations of claim 9 pertaining to a color filter or the limitations of claim 11 pertaining to a post-plasma water treatment process.

It would have been obvious to one skilled in the art to adapt the method of 6,677,243 to manufacture a color filter because the skilled artisan would be quite likely to immediately envisage the pixilated optical element of 6,677,243 serving in such a capacity.

It would have been obvious to one skilled in the art to subject the plasma treated substrate to a water treatment process as part of a cleaning process to remove etching residue.
